

## How We Can Help

---

**Internet** Leveraging the internet is key to your competitive advantage. Cloud technologies and Internet based phone services are just two ways to maximize your infrastructure and reduce expenses.

**Networking** Gigabit Ethernet? Wireless N? PowerLine? We can explain, design and install all types of networks to help you maximize your technology investment.

**New Purchases** We can research, recommend, purchase, install and support all varieties of hardware, software and peripherals or any other type of digital technology.

**Upgrades** Outdated software can cause problems for your business. Insufficient memory and storage can slow your business down. We can upgrade you to what you need easily and quickly.

**myComputerGuy, inc.**  
*"we make IT simple..."*

## Who We Are

---

**Craig Vogel** has been managing infrastructure and technical operations since 1988. He began his career at CTVogel Engineers and built one of the first Computer Aided Design and Drafting networks in New York City. In 1993, he became a Vice President of Technology for the Bankers Trust Company. In 1999, Craig joined Measurisk as Managing Director of Infrastructure and Technical Operations where he designed and built a \$3 million world-class computing infrastructure. Craig is a Microsoft Certified Professional and an Apple Certified Professional and Consultant. As President and Chief Technologist of myComputerGuy, inc., Craig and his team can help you use today's technologies to save time and money while growing your business.

## What We Stand For

---

For most companies, their technology infrastructure can be difficult to manage.

Whether it's hardware, software, the internet or networking, you need someone to help you figure it all out.

At myComputerGuy, our goal is to make today's complex technology simple to understand, simple to use and simple to manage.

Our philosophy is based on reliability, quality and best practices. The combination of these principles enables us to design and build infrastructure that "just works" so that you can focus on growing your business.

## What Our Clients Say About Us

---

Craig has been a great asset to our company since 2003. We are a small business unable to afford dedicated IT staff in house. Craig has filled that niche for us. Our company could not, in many respects, be where we are today if not for Craig's creative responses to our IT needs and support.

### **Nancy K./Certified Public Accountant**

"Thanks Craig for the A+ service. Always there when we need you to address all our computer needs."

### **Ann L./Property Management**

"Craig has saved us money by turning us on to the most cutting edge technology for anti-virus, back-up and storage. He always has great ideas. He is extremely responsive to any calls you reach out to him with. Best of all, he doesn't dilly dally....he comes in and gets right to work! "

### **Kevin B./Barter Exchange**

"We've dealt with many tech support companies, some large and some small. Yet no matter how big they are the individuals working for them have never been as capable as myComputerGuy. Craig Vogel is THE MOST tech- savvy person we have found."
